

COMPARISON TABLE: PLAIN BEARINGS

KS Gleitlager is a specialist in high-precision sliding elements within the Kolbenschmidt Pierburg Group.

The introduction of new technologies in production and surface treatment, innovative development work and a clear customer orientation have made KS Gleitlager one of the world's leading suppliers of metal plain bearings and metal polymer bearings (KS PERMAGLIDE®).

100% made in Germany!

Design		KS PERMAGLIDE® (PMG)	INA	SKF	GGB	Federal Mogul Glycodur	M Group Technymon
Bushings		PAP	EGB(Z)	PCM	PM / MB	PG	P
Flange bushings		PAF	EGF	PCMF	BB	PBG	F
Washers		PAW	EGW	PCMW	WC	PXG	W
Strips		PAS	EGS	PCMS	S	PLG	S
Material							
P1	maintenance-free, suitable for dry run	P10 - standard material = leaded*		Composite F	DU		
		P11 - special material = P10 + improved corrosion resistance*	E40 (B)		DUB		
		P14 - standard material = lead-free*	E40	Composite E	DP4	Glycodur F	MU
		P147 - special material = P14 + improved corrosion resistance**					
P2	low-maintenance, (distribution pockets)	P20 - standard material = leaded*	E50	Composite M	DX	Glycodur A	MX
		P200 - standard material = lead-free*
